

KAFSON SOLAR PANEL

Solar Collectors type KCSSA (full plate) description

Kafson solar collectors are manufactured from high quality materials with great care and requirements according to ISO 9001:2000.

The absorption full plate (one piece) is curved in such a way that allows the copper pipes to rest in the curves and come in touch with almost half the pipes. The absorbers plate is made from 3mm thick copper sheet. The results can be appreciated during the winter time with a high absorption rate.

Collector's material:

- Aluminum profile (anodized)
- Copper absorption full plate (one piece) 0.3mm thick
- 12 copper pipes Ø15mm and Ø 28mm heaters
- Back insulation from one layer of polystyrene and one layer of glass wool
- Side insulation from polystyrene
- Tempered glass 4mm
- Size 171cm X 91cm
